Declaration on the Use of Artificial Intelligence

Each student must complete and sign an individual copy.

Student name: Pedro António Salazar Leite

Student number: 106812

I declare that all decisions and technical content that I produced for this project are my own work.

The following AI tools were used to assist in the development of the project and the preparation of the report. If no AI tool was used, write 'None'.

Tools used

Claude (Anthropic), used through the Claude Code command-line assistant.

Purpose and extent of use

The submitted code (utils.py, walk_forward.py, train.py, my_model.py and the experiments notebooks) was written by me. Claude assisted mainly with debugging, with testing and review of my code, and with some exploratory decisions (for example, candidate lag specifications and preprocessing options, which I then evaluated and selected myself). It also explained design concepts. A small number of snippets in the EDA notebook, and a first draft of one preprocessing function that I later rewrote, were suggested by Claude.

I declare that I fully understand the operation of every component of the project, including those developed with the assistance of the AI tools listed above.
